SKILLS

Product: Roadmaps, PRDs, Azure DevOps, User Research, Jira, Agile/Scrum, Stakeholder Management

Technical: Python, JavaScript/TypeScript, AWS, Security+, Git, SQL, GitHub

AI/ML: Claude, OpenAI, scikit-learn, pandas, NumPy, LangChain, Hugging Face, RAG

PROFESSIONAL EXPERIENCE

Charles Schwab

June 2026 – August 2026

Product Manager Intern

Westlake, TX

- Led design and scoping for a Schwab Assistant capability projected to increase self-service resolution by 15%, partnering across stakeholders to improve support workflows at enterprise scale
- Contributed to a digital support ecosystem serving millions of users, improving system usability, knowledge access, and operational efficiency across support channels
- Drove data optimizations of KPIs, improving digital support efficiency by 5-10% and increasing self-service

Cornell Tech x Break Through Tech

May 2026 – April 2027

AI Fellow

Remote

- 12-month AI/ML fellowship with Cornell faculty with a specialization in Agentic AI and AI Red Teaming; earning the Cornell University Machine Learning Certificate
- Partnered with an industry company with a real-world ML challenge project; TBD

Information and Communication Services – Global Nonprofit

January 2026 – May 2026

Project Manager Intern

Riverton, UT

- Supported AWS migration of a financial audit platform used by 50,000+ volunteer auditors across 31,000 units, coordinating roadmap execution, sprint planning, and cross-functional delivery
- Spearheaded the discovery-phase development and operational use of AuditAI; 6 internal AI agents for the Audit department, automating 30% of common processes and workflows, reducing 50% of manual labor time

MadisonTek – Property/Utility Billing SaaS

July 2025 – December 2025

Software Engineer Intern

Rexburg, ID

- Co-built a SaaS platform for real estate and utility billing, translating product requirements into engineering deliverables across a multi-stakeholder environment
- Compressed prototype cycle from weeks to days using AI-assisted development (Claude Code, Cursor, Codex), enabling faster user validation and production timelines each sprint

PROJECTS

BYU-I Support Agent | *Python, LangChain, OpenAI API, RAG*

- Prototyped an AI-powered campus support agent now live in beta at BYU-Idaho serving 20,000+ students to handle Financial Aid, Registration, and Tech support
- Defined intent categories, conversational flows, and escalation logic; authored requirements and PRD for prototype that was adopted into institutional deployment

LEADERSHIP

Coding Interviews | *Founder/President*

April 2025 – December 2025

- Identified unmet demand for peer-led technical interview prep through informal surveys; founded club that grew from 11 to 30+ active members in two semesters
- Iterated on workshop curriculum based on weekly member feedback; 40% of active members landed internships

EDUCATION

Brigham Young University

September 2023 – July 2026

Bachelor of Science in Computer Science

Rexburg, ID

Cornell University

May 2026 – August 2026

Machine Learning Certificate

Remote
